

TERSO

Sets the mood

FAGERHULT

Terso

Terso and Terso Flat are two powerful pendant luminaires with a simplistic design that is key to catching the on-looker's eye.

Producing a comfortable general light, and available in two different sizes, Terso is an ideal solution for reception desks, entrances and meeting rooms, irrespective of ceiling height. Terso's high gloss surface in black or white is mirrored by the ceiling cup, and is connected via a coloured fabric cable to provide a consist style. To add some additional variety Terso can be produced in an array of different colours to match either a brand or interiors palette.

Terso Flat has a thin and elegant appearance that emphasises any environment with either a matt white or matt black shade. The inside of the luminaire is painted white, which reduced the contrast between the LED light source and the matt shade.

Virtually any colour

Terso can be delivered in an array of different colours to match either a brand or interiors palette. The classic form is easy to fit in any area as a discrete interior element or as a colourful showpiece.

Application

Terso is an ideal solution for reception desks, entrances and meeting rooms, irrespective of ceiling height.

The Light

Constantly updated with the latest LED technology and can always be dimmed.

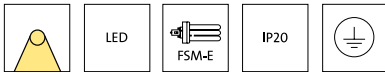

МАЈСВЕТ БЕКТАВ

Terso

Installation

Two point suspension, c/c 55–78 mm.

Connection

Snap-in terminal block 5 × 1.5 mm², through-wiring possible.

Design

The luminaire shade is spun aluminium, specular black or white. Other colours on request. Supplied with colour coordinated fabric cord and specular, steel ceiling cup.

Ø 250 mm: 2.3 m.

Ø 400 mm: 3.8 m.

Dimming

Luminaire with LED is equipped with DALI/Phase-pulse control as standard.

Miscellaneous

Driver life-time: up to 100.000 h/10 % (max failure).

A cut-out in the ceiling cup is made using cutters 94248 for a surface mounted mains cable.

Designed by

Sabina Grubbe.
